

DESCRIPTION

The ASI6622 is a professional PCI-Express sound card designed for use in radio broadcast automation.

Providing 6 play streams that are mixed to 2 balanced stereo outputs and 4 record streams fed from 2 balanced stereo inputs, the ASI6622 features AudioScience's unique "anything to anywhere" mixing and routing.

The ASI6622 provides both balanced analog and AES/EBU inputs and outputs. The maximum analog input and output level is +24dBu.

A choice of uncompressed PCM, MPEG layer 2 and MP3 is available for both recording and playback. All compression is handled by an on-board floating point DSP, allowing the host computer to focus on other tasks.

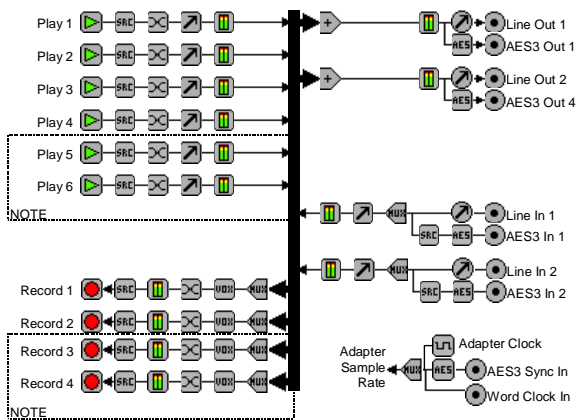

ASI6622 functionality includes MRX™ multi-rate mixing technology, which allows streams of different, sample-rates and formats to be mixed digitally. TSX™ time scaling allows compression/expansion of any or all playback streams in real time with no change in pitch.

FEATURES

- 4/6 mono/stereo streams of playback into 2 stereo outputs
- 4/2 mono/stereo streams of record from 2 stereo inputs
